

14th International Conference on Advanced Technologies,
Systems and Services in Telecommunications

TELSIKS
2019

Serbia, Niš, October 23 - 25, 2019

Call for Papers TELSIKS 2021 Special Session: IoT Applications, State-of-the-Art and Beyond

We live in a world of constant development and changes where innovative technologies like IoT, sensing technologies and wireless sensors networks, 5G and beyond, UAV, machine learning, advanced data analytics will fundamentally redefine the world as we know. All these new technologies, have an important role in creating IoT solutions that reduce costs, improve the quality of services delivered to inhabitants and overall quality of life of people, thus, making world safer and more efficient place for living. Areas where IoT applications and solutions can have significant impact are numerous, like smart cities (energy efficiency, citizens' services, environment monitoring, smart waste, smart traffic), agriculture (food production optimization and high quality food production), industry/manufacturing, transportation/mobility, retail, supply chain, buildings, healthcare, maritime monitoring, etc. On the other hand, these technologies need vast amounts of data to function properly and these data need to be gathered, stored, protected, analyzed and used to create value for social, business, environment, and many other aspects of living.

This special session aims to join the efforts of researchers, experts, technology providers and technology users to discuss and present the latest research findings on development and demonstration of applications based on sensors, sensor networks, emerging sensors and IoT technologies.

To submit contributions to the special session, authors should follow the paper submission guidelines for regular papers. Note that papers submitted to the special session will undergo the same review process as regular papers and will be published in the conference proceedings and IEEE Xplore.

The due date for paper submission is **June 15, 2021**

For further information, please visit the conference website at: www.telsiks.org.rs

If you have any question, please contact us at the following addresses:

Special Session Chair

Prof. Dejan Drajić
School of Electronic Engineering/Innovation center
University of Belgrade, Serbia
